INSERT

The first screenshot shows a MySQL query editor with a CREATE TABLE statement for a 'Student' table and six INSERT statements. The output window displays the results of the INSERT statements as a table with columns: student_id, student_name, email, and phone_n.

student_id	student_name	email	phone_n
1	SPOORTHY	spoorthi12@email.com	12345
2	NEHA	neha2@email.com	57464
3	MANYA	manya2@email.com	73964
4	MANYA	manya2@email.com	97538
5	TANISHA	tanisha3@email.com	45726
6	VARSHITHA	varshitha@email.com	27489

The second screenshot shows the same MySQL query editor with a SELECT query that retrieves all columns from the 'Student' table. The output window displays the results as a table with columns: phone_number, date_of_birth, gender, and department_id.

phone_number	date_of_birth	gender	department_id
12345	2007-12-12	female	101
57464	2007-01-12	female	102
73964	2007-01-01	female	103
97538	2007-10-01	female	104
45726	2007-11-07	female	105
27489	2007-05-05	female	106

CODE:

```
CREATE TABLE Student (  
  student_id INT PRIMARY KEY,  
  student_name VARCHAR(50) NOT NULL,  
  email VARCHAR(20) UNIQUE,  
  phone_number VARCHAR(12),  
  date_of_birth DATE,  
  gender VARCHAR(10),  
  department_id INT  
);
```

```
INSERT INTO Student VALUES (1, 'SPOORTHY', 'spoorthi12@email.com',  
'12345', '2007-12-12', 'female', 101);
```

```
INSERT INTO Student VALUES (2, 'NEHA', 'neha2@email.com', '57464',
```

```

'2007-1-12', 'female', 102);
INSERT INTO Student VALUES (3, 'NAVYA', 'navya2@email.com', '73964',
'2007-1-1', 'female', 103);
INSERT INTO Student VALUES (4, 'MANYA', 'manya2@email.com', '97538',
'2007-10-1', 'female', 104);
INSERT INTO Student VALUES (5, 'TANISHA', 'tanisha3@email.com', '45726',
'2007-11-7', 'female', 105);
INSERT INTO Student VALUES (6, 'VARSHITHA', 'varshitha@email.com',
'27489', '2007-5-5', 'female', 106);
SELECT * FROM Student;

```

UPDATE:

The first screenshot shows the initial state of the database. The SQL editor contains the following queries:

```

1 CREATE TABLE Student (
2   student_id INT PRIMARY KEY,
3   student_name VARCHAR(50) NOT NULL,
4   email VARCHAR(20) UNIQUE,
5   phone_number VARCHAR(12),
6   date_of_birth DATE,
7   gender VARCHAR(10),
8   department_id INT
9 );
10
11 INSERT INTO Student VALUES (1, 'SPOORTHI', 'spoorthi12@email.com', '12345', '2007-12-1', 'female', 101);
12 INSERT INTO Student VALUES (2, 'NEHA', 'neha1@email.com', '57464', '2007-1-12', 'female', 102);
13 INSERT INTO Student VALUES (3, 'NAVYA', 'navya1@email.com', '73964', '2007-1-1', 'female', 103);
14 INSERT INTO Student VALUES (4, 'MANYA', 'manya1@email.com', '97538', '2007-10-1', 'female', 104);
15 INSERT INTO Student VALUES (5, 'TANISHA', 'tanisha1@email.com', '45726', '2007-11-7', 'female', 105);
16 INSERT INTO Student VALUES (6, 'VARSHITHA', 'varshitha@email.com', '27489', '2007-5-5', 'female', 106);
17
18 UPDATE Student
19 SET phone_number = '9876543210'
20 WHERE student_id = 1;
21
22 SELECT * FROM Student;

```

The output window shows the result of the SELECT query:

student_id	student_name	email	phone_no
1	SPOORTHI	spoorthi12@email.com	9876543210
2	NEHA	neha1@email.com	57464
3	NAVYA	navya1@email.com	73964
4	MANYA	manya1@email.com	97538
5	TANISHA	tanisha1@email.com	45726
6	VARSHITHA	varshitha@email.com	27489

The second screenshot shows the same IDE after running the UPDATE query. The SQL editor now shows the result of the UPDATE query:

```

1
2 PRIMARY KEY,
3 [50] NOT NULL,
4 [20],
5 [12],
6
7
8
9
10
11
12
13
14
15
16
17
18
19
20
21
22

```

The output window shows the result of the SELECT query after the update:

phone_number	date_of_birth	gender	department_id
9876543210	2007-12-12	female	101
57464	2007-01-12	female	102
73964	2007-01-01	female	103
97538	2007-10-01	female	104
45726	2007-11-07	female	105
27489	2007-05-05	female	106

CODE:

```
CREATE TABLE Student (
```

```
student_id INT PRIMARY KEY,  
student_name VARCHAR(50) NOT NULL,  
email VARCHAR(20) UNIQUE,  
phone_number VARCHAR(12),  
date_of_birth DATE,  
gender VARCHAR(10),  
department_id INT  
);
```

```
INSERT INTO Student VALUES (1, 'SPOORTHY', 'spoorthy12@email.com',  
'12345', '2007-12-12', 'female', 101);  
INSERT INTO Student VALUES (2, 'NEHA', 'neha2@email.com', '57464',
